

# Connect Garmin dog device to MiniFinder Hunter

## 1. Go to Devices

Choose "Connect Garmin dog unit"

## 2. Step by step

- Instal Garmin Connect.  
*Download and instal Garmin Connect-app on your smartphone*
- Connect your smartwatch to Garmin Connect  
*Follow the instructions in Garmin Connect to connect your smartwatch*
- Choose your smartwatch in MiniFinder Hunter
- Start/Download MiniFinder Hunter  
*Go to Connect IQ Store och download MiniFinder Hunter app to your smartwatch*

## 3. Start MiniFinder Hunter on your smartwatch

## 4. Press the menu button

Choose "Scan"

## 5. Confirm the connection

*When the hand unit is found, confirm the connection between the smartwatch and the hand unit*

## Check the settings

- Make sure the setting "Broadcast Dog Data" is on in the hand unit.
- The hand unit should **not** be connected to any other smartwatch app, for example DogTrack.

## After the connection

- Once the connection between the watch and hand unit is established, the app will wait for information from the hand unit.
- If a dog unit is connected to your hand unit, you will be able to see the dog's information in the app.
- When the information from the dog is sent, you will receive a confirmation in MiniFinder Hunter.
- You can now see your dog's position in the MiniFinder Hunter app.
