

Connect your Garmin dog tracker to MiniFinder Hunter

1. Go to Devices

Select "Connect Garmin dog tracker"

2. Step by Step

- Install Garmin Connect.
Download and install the Garmin Connect app on your smartphone
- Pair your smartwatch with Garmin Connect
Follow the instructions in Garmin Connect to pair your smartwatch
- Select your smartwatch in MiniFinder Hunter
- Start/Download MiniFinder Hunter
Go to the Connect IQ Store and download the MiniFinder Hunter app to your smartwatch

3. Start MiniFinder Hunter on your smartwatch

4. Press the menu button

Select "Scan"

5. Confirm the connection

When the handheld device is found, confirm the connection between the smartwatch and the handheld device

Check settings

- Make sure the "Broadcast Dog Data" setting is enabled on the handheld device.
- The handheld device should not be connected to any other smartwatch app, such as DogTrack.

After connection

- Once the connection between the watch and the handheld device is established, the app will wait for information from the handheld device.
- If a dog device is connected to your handheld device, you will be able to see the dog's information in the app.
- When information from the dog is sent, you will receive a confirmation in MiniFinder Hunter.
- You can now see your dog's position in the Hunter app.
